A downloadable asset pack

Download Now Name your own price

Epic 8 space ship pack with animated engines, shields, weapons, and destruction animation. Also include 4 animated projectiles. Check out the preview gifs in the screen shots to see what all you will be downloading. All animations include the .ase file in addition to the sprite sheets.

Works great with other Void assets.

Enjoy!

THANK YOU!

I am a heavy user of Construct 3 and make various templates and tutorials available for free. These assets work great with the engine. If you are new to making games or want to try out a refreshing engine that makes game development *fun* again using both intuitive event sheets and JavaScript, you can support me by using the referral link below:

Hey! Absolutely fantastic set of packs. It would be great if we could get higher resolution exports of these sprite sheets! I see there are the Aseprite files, but as someone who doesn't own an Aseprite license I'm not able to do this myself.

Thanks for the excellent work!

What engine are you using? You can render things pixel perfect by setting the render scale to nearest
