Spaceship with animated engines, shields, and weapons! Check out the preview gifs in the screen shots to see what all you will be downloading. All animations include the .ase file in addition to the sprite sheets.

Works great with other Void assets.

Enjoy!

THANK YOU!

Thank you, Foozle and Baldur! The whole Void series is the heart of my game: the Main Ship, all three Fleet Packs (Kla'ed and Nairan as buyable ships, Nautolan as the enemies), the Environment Pack and the Pickups Pack. The modular design made it really fun to build a ship that changes with every part you buy. Credited in-game. Here's the result, a free demo: https://vitorconde.itch.io/orbitra

Thank you for allowing us to use your asset pack free of charge. I loved how the ship was extremely customizable and was easy to combine together.

Here is the project I completed with the help of your work!
