A downloadable asset pack

Download Now Name your own price

12 animated pickups that can be matched with assets from the Void - Main Ship pack for your game. Check out the preview gifs in the screen shots to see what all you will be downloading. All animations include the .ase file in addition to the sprite sheets.

Works great with other Void assets.

Enjoy!

THANK YOU!

I am a heavy user of Construct 3 and make various templates and tutorials available for free. These assets work great with the engine. If you are new to making games or want to try out a refreshing engine that makes game development *fun* again using both intuitive event sheets and JavaScript, you can support me by using the referral link below:

These packs are great! Worked extremely well in Godot! Used all the space packs while learning Godot! Perfect for beginner devs, as for the animations arent super complex! Thanks for the amazing packs!
